## *Dermaplaning*

This session will explain how to perform Dermaplaning. This is a treatment which uses a sterilised surgical blade to remove the fine vellus hair and keratinised cells from the outer skin layer (epidermis), which leaves the skin looking fresh, shiny, clean. Dermaplaning can also be used alongside other salon treatments. You will firstly learn the relevant anatomy, skin types, contraindications, what equipment is required and much more. After covering the theory, you'll do the practical on your model with a tutor led demonstration.

---

## *BB Glow Microneedling*

You will learn how to create a delicate illuminating & lighting foundation effect, to reduce facial imperfections, align the skin tone & structure and provide a subtle effect of makeup without mask effect.

Our Trainer will guide you through techniques of delivering BB GLOW Microneedling on live models. The BB Glow Course covers the BB glow treatment, which is carried out using a microneedling pen, then you will use Mesotherapy, BB pigments and a mask to finish off the look

## *LED Light Therapy*

LED Light Therapy uses a variety of different lights to penetrate into the dermis to gain the desired effect. It can be effectively used to stimulate collagen and elastin, reduce inflammation, accelerate healing and help to tackle acne/breakouts. LED Light Therapy can be used as a stand alone service or combined with other aesthetics services.

You will learn to an Industry Standard how to provide this treatment to paying customers. Full practical demonstrations and practice time will be provided during this session
